As a Specialist in the fields of Spiritual Healing, Ancient Civilizations and Inner Research, he teaches courses in Astral Travel, Past Lives Research, Inner Harmonizing, and Selfic Healing. Additional teachings done by him are in the realms of social, spiritual, economic, political and organizational implications of community life.

Crotalo has taken many people through Egypt and experienced transformational shifts both personally and with his groups. There are codes of sacred information stored in the Temples that need to be unlocked. If you would like to have the opportunity to experience a truly valuable spiritual awakening, this is the pilgrimage for you.

One of the most enticing aspects of the trip will be the private visits of the Great Pyramid (Cheops) & Philae Temple, where we would have time to deeply connect to ourselves. Aside from the visit to the temples, pyramids and museums, we will spend our days travelling in a luxury boat down the River Nile. The lands along the Nile are rich with plant and bird life; rural farmers work the land by hand and it is absolutely lovely to travel along these shores. With our boat, we will be able to pull into little islands and visit places that few people ever see.

Souls of Egypt Travel, the organizers of the trip, are specialized in bringing spiritual truth seekers together as part of their vision for global and personal transformation. Collaborating with other leaders and teachers in the spiritual world, working with groups to share the mysteries and magic of Egypt and her sacred sites.

Thus, **Abydos** was an important cult center for Osiris. A number of temples dedicated to Osiris, all of which were located in one area, were built prior to the reign of Seti.

The **Temple of Seti**, however, was built on new ground to the south of the said temples. Continue to **Dendera** to explore, The Dendera Temple Complex covers an area of 40,000 square meters (sq. ft.), and is surrounded by a large mudbrick wall. Within this enclosure are various structures, including the Temple of the Birth of Isis, a Roman mammisi (attributed either to the reign of Trajan or Nero), a sanatorium, and a sacred lake. It was made famous by a carving that many believe depicts an electrical lightbulb. Nevertheless, the most impressive part of the temple complex is undoubtedly the **Temple of Hathor**. The **Temple of Hathor** was largely constructed during the Late Ptolemaic period, specifically during the **reign of Ptolemy XII and Cleopatra VII**. Later additions were made during the Roman period. Although built by a dynasty of rulers who were not native Egyptians themselves, the design of this temple has been found to be in accordance to that of other classical Egyptian temples, with the exception of the front of the hypostyle hall, which, according to an inscription above the entrance, was constructed by the Emperor Tiberius.
